Temporary Limited License in Psychology (TLLP)

Traditional Timeline for Masters training-state of Michigan Universities

Year 1 thru 2 of Masters of Psychology program:

- Receive clinical training.
- Candidates are LIVE supervised by a licensed provider or work for a clinic.
- The level of engagement does not require a TLLP.

End of Year 2:

- Masters of Psychology training is completed. Submit application for TLLP to begin practicum training, prior to taking the licensing exam.

Traditional Timeline for PhD Psychology Candidates doctoral training-state of Michigan Universities

Year 1 thru 2 of PhD program:

- Receive clinical training for 500+ hours.
- Candidates are LIVE supervised by a licensed provider or work for a clinic.
- The level of engagement does not require a TLLP.

End of Year 2:

- Apply to the university for a Masters in Psychology. Submit application for TLLP in order to begin a practicum training in the state of Michigan. (Below is a list of current positions requiring a TLLP)

Year 3 thru 5 (sometimes 6).

- Complete practicum (clinical training) in various placements in the community. These are PRIOR to internship. Accumulate experience at 10-15 hours per week. These are the key years in which a TLLP is necessary.

Year 6 thru 7:

- A psychology internship is comparable to medical residency. The internships are highly competitive. If remaining in Michigan, an internship may require a TLLP. However, some sites do not require them. More often than not, the sites have the requirements due to insurance requirements. Students apply NATIONALLY to internship, interview at sites and then submit a rank ordered list of their preferred sites. They cannot directly accept offers. It is a computer matched system similar to medical residency. They cannot apply to a program that requires a TLLP if the student is not eligible through state guidelines.

Samples of current practicum sites requiring a TLLP, from UM Practicum Directory:
